Add to My Archive

If you find a specific document you want to save for later, you can use My Archive to bookmark it. The simplest way to do this is by clicking the Add to My Archive button here. Whether you're a single researcher or a teacher looking to share images with a class, this is found on all of our document details pages. To get to My Archive, click the button at the top of the page.

Register for My Archive

You will need to register for a My Archive account if you haven't already. It takes 15 seconds to fill in and will let you store as many documents as you like on your bookshelf.

Lightbox

If you want to save individual pages rather than whole documents, you might want to use Lightbox instead. Once you have found the page you want to save, click Add to Lightbox. Now when you visit your personal Lightbox your page will appear here.

Folder

Within Lightbox, you can create different folders to organise your pages. Under image option, you can download selected pages to PDF and run a presentation for your selected pages.
