### **AM Quartex: Create your own digital collections and showcase your archives**

Do you want to showcase your archival material by building dynamic user-friendly digital collections that are engaging and intuitive for your patrons, and facilitate discovery by offering multiple access points and cutting-edge full-text search?

Quartex, developed by AM, makes that possible. AM has years of experience creating and showcasing digital collections. We understand the importance of engaging communities and we want to support you in serving yours.

With Quartex, you can build great-looking websites that are easy to maintain without needing technical expertise. The platform can be your one stop shop for asset and content management, cataloguing, transcription and exhibit creation, it's all in one single comprehensive system.

You can host images, multi-page documents and born digital PDFs as well as audio and video content. Create unique site layouts using multiple design elements, all featuring your institutional branding, and facilitate discovery across your site using a one-click transcription service to enable full-text search.

Quartex is fully hosted and cloud-based which gives you the flexibility to manage your content and create your website from any machine, wherever you're working.

Bulk upload and editing of content is simple, quick and secure. All websites are accessible and responsive, designed to be viewed by your community on any device, anywhere. Quartex has been implemented at institutions of all types and sizes and by one person or by a team of people.

No special skills are required, you can simply ingest your assets, add the associated metadata and use our different content elements to design your website. So what are you waiting for? Sign up for a demo to get started with Quartex today.
